

Page 3 - Image-Based Page

[This page is an IMAGE - requires AI/OCR extraction]

This page appears as an image in the PDF.
The text you see is actually rendered as pixels,
not as native PDF text content.

To extract text from this page, you need:

- OCR (Optical Character Recognition), or
- AI Vision capabilities (like Claude)

This simulates scanned documents, photos of documents, or PDFs created from images.

Common examples include:

- * Scanned paper documents
- * Faxed documents converted to PDF
- * Screenshots saved as PDF
- * Historical documents digitized as images
