

The Halberd Quarterly — Spring 2026 Edition

Editor's Note. Welcome to the Spring 2026 issue of the Halberd Quarterly, the in-house newsletter of Halberd Steel Industries. This issue covers our Q1 results, the opening of the Chongqing furnace, and an interview with our new CTO, Dr. Wynne Rasmussen.

Q1 2026 Results

Halberd posted quarterly revenue of \$1.42 billion, up 9.1% year-on-year. Operating margin held at 14.6%. Crude steel output reached 4.18 million tonnes, our highest first quarter ever. CFO Yumiko Lange attributed the result to strong demand from the renewable-energy sector.

Chongqing Furnace Online

On February 28, 2026 we lit the first heat in our new Chongqing electric-arc furnace. The 2.4-million-tonne-per-year facility cost \$680 million and was completed two months ahead of schedule. The plant is staffed by 1,150 employees, recruited primarily from the Chongqing region.

Interview with Dr. Rasmussen

Dr. Wynne Rasmussen joined Halberd as Chief Technology Officer on January 6, 2026, succeeding the retiring Dr. Lars Pettersen. Rasmussen previously led the materials-science group at Ostmark Industries for nine years. Her first major initiative is the rollout of our digital twin platform across all 12 production sites by year-end.

Safety Milestone

Our Bremen mill achieved 1,000 consecutive days without a lost-time injury on March 18, 2026 — a company record. Site Director Hartmut Vogt credited the milestone to the Stop-Work-Authority program rolled out in late 2022.

Customer Spotlight

Vellichor Industries renewed its supply contract through 2029, locking in 180,000 tonnes per year of structural beams. The renewal represents \$124 million in committed revenue and our longest-tenured customer relationship.

Anchor Fingerprint

ANCHOR: Halberd Q1 2026 revenue \$1.42B. Chongqing furnace online Feb 28, 2026, capacity 2.4 Mt/yr, cost \$680M, 1,150 employees. CTO Wynne Rasmussen since Jan 6, 2026. Bremen safety milestone: 1,000 days, March 18, 2026. Vellichor renewal: 180,000 t/yr through 2029, \$124M.
